

ARAB AFRICAN FOR INVESTMENT AND DEVELOPMENT HOLDING (AACID)

WHO WE ARE?

Ambitious for sustainable, innovation-led future with unique business models by diversifying Africa's economy across multiple industries.

WHAT WE DO?

“AACID” Holding Company Includes a number of shareholders and investors in the Republic of Sudan and abroad, with a primarily view to invest in the exchange of benefits between the States of the region, therefore facilitate the activation of economic diversification, between the Arab States and Africa on one side, and the Arab Islamic finance funds and on the other side, through smart partnerships between the public sector and the private sector in the areas of agriculture, energy, communication services and infrastructure.

OUR IDENTITY

• *Our Vision*

To be a catalyst and an essential pillar for change to contribute to the achievement of sustainable development on the African continent.

• *Our Mission*

To build and manage secure and valuable investment portfolios in Sudan and Africa for projects of a diverse nature, aiming to ensure maximum benefits, fewer risks as well as economic, political, and social benefits for Sudan and countries in the region.

• *Our Ideology and Values*

We Have an **Ambition** to embrace and drive **Change** while building **Trust** for **Innovative** solutions that add value with **Excellence**.

- **Ambition:** to shape a sustainable future for Africa.
- **Change:** we must think and act differently to create our brighter future.
- **Trust:** We will never promise something we can't do.
- **Innovation:** Our motto has always been innovation, not imitation, we turn creative and innovative thinking into reality, by introducing new ideas and solutions.
- **Excellence:** We strive for excellence in everything we do and are passionate about delivering quality results.

OUR BUSINESS SECTORS

1.ICT

We offer cutting edge technologies that is designed and integrated specifically to meet African environmental challenges. We are working hand-in-hand with local service providers to deliver reliable and affordable communication services from infrastructure of fiber optics and mobile/fixed access networks to vertical value-added systems and applications that boost the utilization of communication infrastructure.

We're looking forward along with our local partners to be the most trusted services provider that helps end-users, from both individuals and corporates, giving them the opportunity to communicate better and more space to focus on their core activities and maximize benefits.

As Nokia Networks partner, AACID offers a full range of ICT solution including but not limited to fiber optics infrastructure, 2G,3G,4G, and 5G mobile networks, voice and data fixed networks, content delivery and value-added service platforms, data centers, and e-government infrastructure.

2. RENEWABLE ENERGY

Energy consumption and availability present a major challenge in Africa both for home and industrial use.

AACID through its technical subsidiaries are investing in sustainable power solutions from the production of solar panels, to design, installation and operation of power plants producing tens of megawatts of clean energy.

In order to optimize the supply chain for the renewable projects AACID is working to establish a manufacturing facility in Africa for solar panels and steel fabrications with flexible production lines scaled up in phases that will gradually reduce the costs per unit produced, increasing the market share of the product, and relying on local raw materials rather than importing manufactured materials.

3. AGRICULTURAL

AACID employ advanced technologies in agriculture to overcome infrastructure challenges in Africa and reduce the operation cost and increase productivity either through projects of direct cultivation or partnership with local cultivator providing them the required technologies and infrastructure services like irrigation.

AACID is accompanying international standards in its process from early beginning to ensure competition of the production in the global market.

One model that AACID is currently applying with aim to make investment in agriculture of better returns and less risk is the provision of infrastructure in partnership with small and medium land.

owners, this model is being implemented in co-operation with the Micro-finance Institutes and civil society organizations.

The program includes development of selected lands for agriculture through utilization of practical, efficient and easy to operate technologies

4. MINING

AACID have started with gold mining targeting 10 tons by 2022, to diversify its assets portfolio. At the same time the company have planned to mine for industrial minerals, by which AACID can fulfill all the needs of raw materials to the production towers, solar panels and other components required for the projects executed within Africa by AACID or any other institutions.

This is part of AACID's strategic plan, which seeks a better control over the supplies and to enrich the local trade volume within Africa, which shall bring additional benefit to local communities and achieve higher efficiency for the projects and hence for our investments.

**MORGAN TEL**

Offer turn-key solution and managed end-to-end services to its customers, primarily focused on designing, implementing and operating mobile networks specifically in rural areas

**MORGAN ZONE**

A licensed Wi-Fi Operator, offers communications, computing, and storage infrastructure products and solutions along with over-the-top applications.
